DATABASE LAB DEMO

- Archit Sangal
IMT2019012

- Show the program runs and some functionalities.
- Structure -

```
struct Book{
     int unique_book_number;
     char author_name[100];
     char book_name[100];
     char student_name[100];
};
```

Key Features:

1. Book can be added and deleted
2. Used recursion (an improvement over C project).
3. Book can be issued and if the book has been returned records can be updated.
